My CV

DEMO PURPOSE

Fusion 360 · Figma · PRACTICE
Prototyping · debugging · documentation · teamwork

EXPERIENCE

Student Engineering Assistant | Northside Makers Lab · Portland, OR · 2025 – Present

- Help maintain shared electronics benches and prepare microcontroller kits for weekly student workshops.
- Wrote concise setup guides and troubleshooting notes that made first-time project builds easier to follow.

Summer Technology Intern | Cedar Grove Community Energy · Portland, OR · Summer 2024

- Built a Python data-cleaning script for sample building-energy readings and summarized anomalies for the project team.
- Presented a small dashboard prototype to mentors and incorporated feedback into the next iteration.

SELECTED PROJECTS

Pocket Greenhouse Monitor | ESP32 · C++ · MQTT · 2025

- Designed a low-cost temperature and soil-moisture monitor; streamed readings to a simple web dashboard.
- Added sensor calibration checks and documented setup so classmates could reproduce the prototype.

Accessible Campus Route Finder | Python · OpenStreetMap sample data · 2024

- Created a student project that compares campus paths using distance and manually tagged accessibility features.
- Interviewed four student volunteers and revised the route filters to make results easier to scan.

AVERY MORGAN · PORTFOLIO CV · DEMO / SAMPLE

EDUCATION

B.S. Computer Engineering | Cascade State University · Portland, OR · Expected May 2027

- Relevant study: data structures, digital logic, circuits, embedded systems, probability, human-centered design.
- Campus involvement: Robotics Club build team; peer mentor for introductory programming lab.

ADDITIONAL PROJECTS

Smart Bike Light | Arduino · C++ · laser-cut enclosure · 2023

- Prototyped a motion-responsive rear light with adjustable brightness and a compact rechargeable power circuit.
- Tested enclosure fit and mounting options across three frame styles in a student
